1. Background

The financial risk management is managed through the Financial Regulations and the Financial Risk Management Policy.

General Risk for Perranzabuloe Parish Council is managed with advice from South West Councils.

- The General Risk Management & Health & Safety is reviewed annually
- The Clerk meets with the advisor from South West Councils to discuss any changes in operations and evaluate the work carried out by the Parish Council.
- A General Risk Assessment report is generated

This covers:

- Risk Assessment
- Overview
- Safety Action Plan
- Health & Safety Management

There is also a Health & Safety Policy which is reviewed and updated following the meeting.

The Clerk has overall responsibility for Health & Safety.

South West Councils also acts as the Parish Council's professional employment law and HR advisor, and Perranzabuloe Parish Council is insured through them for risks in HR matters.

- The Clerk ensures all staff have up-to-date contracts
- All staff are issued with handbooks that inform them of their responsibilities and those of the Parish Council
- Staff meetings are held regularly to enable any issues regarding working arrangements and health & safety to be raised in an open manner and at which matters of health & safety are discussed
- The Clerk maintains an open door policy to allow staff to raise any issues

All papers regarding risk type and management as well as the Safety Action Plan are kept on file in the Parish Council offices and can be referred to by members or staff at any time.

2. Organisation and Arrangements

2.1 The Parish Clerk will:

- ensure that risk assessments are carried out for areas and activities under their control
- develop and deliver training in risk assessment techniques where this is appropriate, e.g. for line managers and members of risk assessment teams
- ensure that such assessments are updated at regular intervals or whenever there is reason to believe that the assessment is no longer valid
- ensure that risk assessments are adequately recorded and documented
- ensure that action is taken to adequately control risks to health and safety identified by the assessment
- ensure that risk assessments are suitable and sufficient as required by regulation 3(1) of the Management of Health and Safety at Work Regulations 1999
- ensure that staff under their control are kept adequately informed of risks to health or safety and also of any control measures provided
- ensure, for areas under their control, that contractors or visitors to the areas who may be exposed to risk are adequately informed of the risk and any required precautions or preventive measures
- ensure all buildings are secured and that keys are stored safely

2.2 Contractors

Contractors are responsible for assessing the risks arising from their activities. It is not the Council's responsibility to carry out risk assessments for contractors. This applies to a wide range of tasks for which contractors are engaged and is not limited to construction works. The Council does, however, have a responsibility to ensure that works carried out on its behalf are performed with due regard to health and safety. It is important to check contractor's risk assessments.

Any person engaging contractors will:

- where necessary, ensure that the contractors have carried out an adequate risk assessment on the proposed work;
- where there is any doubt as to the adequacy of a contractor's risk assessment or where further advice is required, will submit the risk assessment to the Parish Clerk for approval;
- ensure that contractors working on Council property are informed of any risks to their health or safety inherent in the property or arising from Council activities carried out at the property.
